

ROLLING SHUTTERS

Installation | internal - external

Characteristics | the rolling shutter characterizes far back the external aesthetic of houses, buildings and shops. A closure element that, despite the upper hand of new closure typologies, finds difficulty substitutes that can fulfil to its principal characteristics: no obstacles in the opening passage thanks to the collection of the cover inside a closed container that has small dimensions. At the same time security and visibility thanks to a knit or drilled system for the shop windows; usage practicality thanks to motorization systems; quality/price rapport incomparable

- CLOSURE SUITABLE FOR PRIVATE
- AND PUBLIC USAGE, APPRECIATED
- FOR AMOUNT OF SPACES AND LOW
- PRICES
